EDUCATION

B.Tech, Artificial Intelligence and Machine Learning

Sri Shakthi Institute of Engineering and Technology

- 2020 - 2026 | Coimbatore
- CGPA 8.47

HIGH SCHOOL CERTIFICATE

The Leaders Matric Higher Secondary School

- 2020 – 2022 | karaikudi
- state board | 84.66%

TECHNICAL SKILLS

- Python
- HTML,CSS
- SQL
- Data Structures and Algorithm
- JavaScript
- React.js

AREAS OF INTEREST

- Full stack development
- Database Management System
- Problem Solving

CODING PROFILE

- 250+ Problems on LeetCode
- SQL and Python Intermediate on HackerRank

CERTIFICATION

- Python programming - Guvi
- Data Structures and Algorithms - Great Learning

LANGUAGES

- Tamil
- English

PROFILE

I am a B.Tech student specializing in Artificial Intelligence and Machine Learning, passionate about building innovative and scalable software solutions. With a strong foundation in Python, SQL, and front-end technologies like React, I am eager to collaborate with dynamic teams, contribute to impactful projects, and apply my software development expertise to real-world challenges.

PROJECTS

E-Commerce Web Application

Plant Sales

- Developed an eCommerce platform for selling a variety of plants online, enabling users to browse different plant categories, view detailed product descriptions, and add items to their cart.
- Implemented a responsive and user-friendly interface to enhance the shopping experience.
- **Technologies Used:** HTML, CSS, JavaScript, React, Express.js, MongoDB.
- **Link:** e-commerce-Greenhaven [🔗](#)

Real-Time Power Consumption Monitoring Application

- Developed an application to monitor and display real-time power consumption data, providing users with insights into their energy usage for better management.
- Integrated real-time analytics to enhance user awareness and decision-making regarding energy consumption.
- **Technologies Used:** Flutter.
- **Link:** power_consumption_analytics.git [🔗](#)

YouTube Watch History Sentiment Analysis

- Developed a sentiment analysis platform to analyze YouTube watch history and categorize user preferences based on viewed content.
- Applied NLP techniques to determine sentiment polarity (positive, negative, or neutral), providing insights into user preferences and content consumption patterns.
- **Technologies Used:** Python, Pandas, NLTK, Matplotlib.
- **Link:** Youtube-History-Analysis [🔗](#)

TECHNICAL TRAINING

Python Developer Intern

- Developed and optimized Python-based applications, enhancing code efficiency and problem-solving skills.
- Collaborated effectively within team environments to deliver high quality solutions

CodeBytes - mentee

- Learned core OOP concepts for building structured programs.
- Practiced Data Structures and Algorithms to improve coding and problem-solving skills.
- Gained basic understanding of databases and SQL for handling data efficiently
